

Name _____

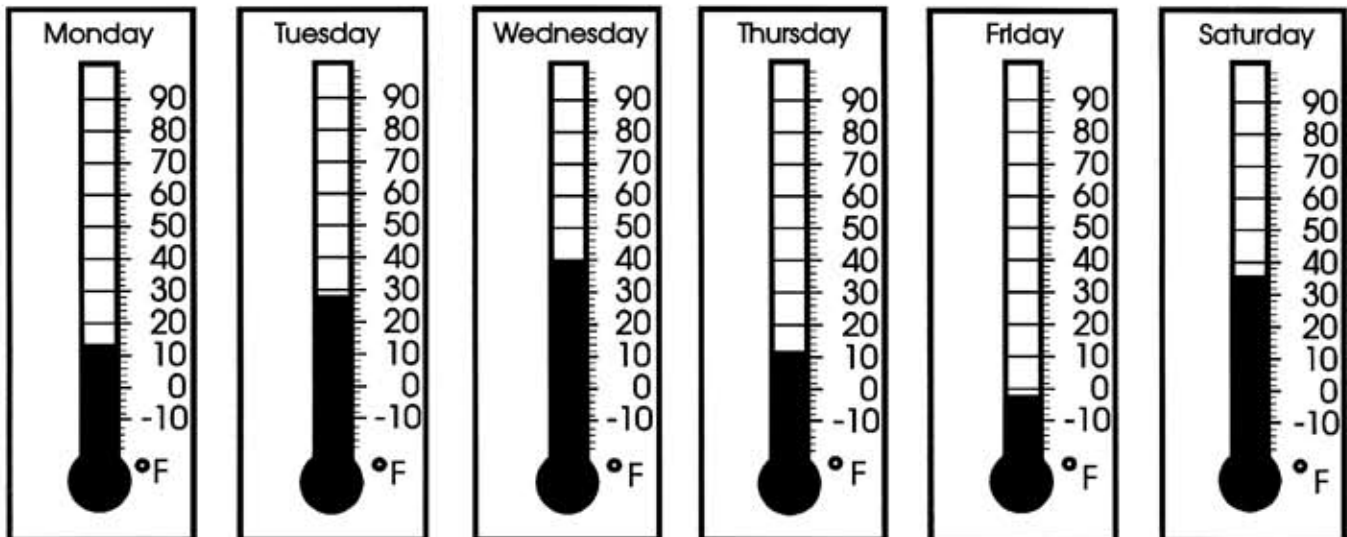

Airlines need to be very aware of the temperature during the winter. Freezing temperatures can affect a flight. The wings and engines can freeze and the ground crew needs to make sure that they are de-iced.

* **Water freezes at 32° F.**

Look at the thermometers below and write the temperature for each one. Then answer the questions.

* **Each line on the thermometers show two degrees Fahrenheit.**

1. On which days does the ground crew need to check the engines and wings carefully?

2. How many days are above freezing? _____

3. Which day is the coldest? _____
